Summary

Final-year B.Tech CSE (Cloud Computing & Automation) student who builds full-stack web products and the cloud infrastructure they run on. Built and launched **GapInfly**, a live AI career platform on **Next.js**, **React**, **TypeScript** and **Supabase** (**PostgreSQL**), and delivered multi-environment **AWS** infrastructure with **Terraform**, **Docker** and **GitHub Actions** as a Cloud Engineer Intern. **AWS Certified Solutions Architect - Associate**. Seeking a **full-time software or cloud engineering** role starting 2027.

Education

VIT Bhopal University

2023 - 2027

B.Tech CSE (Cloud Computing & Automation), CGPA: **8.43/10**

K.R Education Center

2020 - 2022

Class XII: **74.5%** | Class X: **83.83%**

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, Bash, C++

Frontend: React, Next.js (App Router), Tailwind CSS, Framer Motion, HTML/CSS

Backend & Data: REST APIs, Node.js (Express), Next.js Route Handlers, FastAPI, PostgreSQL, Supabase (Auth, Storage, Row-Level Security), LLM APIs (Gemini, Claude, OpenAI)

Cloud & DevOps: AWS (EC2, S3, VPC, IAM, ECR, EBS, CloudWatch), Terraform, Docker, GitHub Actions, CI/CD, Vercel, Linux, Git

CS Fundamentals: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS

Familiar With: Kubernetes, Google Cloud Platform (GCP)

Experience

Zulton Technology | Cloud Engineer Intern

Remote | May 2026 - Jul 2026

- Provisioned **3** AWS environments spanning **EC2**, **VPC**, **ECR**, and **IAM** through version-controlled Terraform configurations, cutting a multi-step console setup to a single apply and making any environment rebuildable from code.
- Containerized **8** backend services with **Docker** and shipped them through a **3-stage GitHub Actions workflow** – build, image push to ECR, and deploy – that ran automatically on every merge to main.
- Configured **15+** **CloudWatch** alarms and log groups on CPU and HTTP error-rate thresholds, surfacing failed deployments within minutes instead of during manual log review.

Projects

GapInfly – AI Career Intelligence Platform | Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind, Vercel

Sep 2026

- Built and launched a **three-sided** career platform for students, employers and college placement officers, live at gapinfly.in – **22** App Router pages and **3** REST API routes in TypeScript, deployed on **Vercel**.
- Designed a **6-table PostgreSQL** schema on Supabase secured by **16 row-level security policies**, so students read only their own data and employers only applications to their own jobs; added passwordless **6-digit OTP sign-in** and document uploads via Supabase Storage.
- Engineered a hybrid **GapScore** engine: a deterministic, weighted skill rubric across **10** target roles produces a consistent, explainable 0–100 score, and an optional LLM layer rewrites the summary and next actions.
- Wrote a provider-agnostic LLM layer (**Gemini**, **Claude**, **OpenAI**) behind adaptive **5-question** mock interviews and personalised roadmaps, with deterministic fallbacks so a model outage never breaks a user flow and roadmap links are never AI-generated.

Full DevOps Automation Platform | Docker, Terraform, GitHub Actions, AWS EC2/ECR/IAM

Jan 2026

- Defined the full stack – VPC, security groups, EC2 instances, and IAM roles and instance profiles – in **Terraform**, collapsing a manual build-tag-push-SSH-deploy sequence into a single pipeline run triggered on push.
- Containerized a **Node.js (Express)** REST backend with Docker, published images to **Amazon ECR**, and deployed them to EC2 through a **GitHub Actions** workflow on every push.
- Secured the delivery pipeline by moving every credential into **GitHub Secrets** and scoping IAM roles to least privilege, leaving **0 long-lived access keys** in application code.

Certifications

AWS Certified Solutions Architect - Associate (SAA-C03)

Aug 2026

AWS Certified Cloud Practitioner (CLF-C02)

Jul 2026

Google IT Support Professional Certificate

Jan 2026

Achievements

- Scored **900+/1000** on both AWS certification exams (SAA-C03 and CLF-C02), clearing each above the required passing score.
- Solved **120+** data structures and algorithms problems on **competitive Coding Platforms**.
